

Healthy Interiors v2.3 / BIFMA LEVEL® 7.4.4 - Product List

must select approved fabrics and finishes to ensure compliance - see bottom of list for additional notes on specification.

Healthy Interiors criteria furniture and furnishings must not contain:

- formaldehyde (VOC)
- per and poly-fluorinated compounds (PFAS)
- polyvinyl chloride (PVC)
- antimicrobials
- flame retardants
- ✗ indicates area of non-compliance

product name	brand	meets VOC criteria	no added PFAS	<1% PVC**	no anti-microbials	no added flame retardants	exclusions or ordering spec notes

notes on product compliance and specification

product name	brand	meets VOC criteria	no added PFAS	<1% PVC**	no anti- microbials	no added flame retardants	exclusions or ordering spec notes
--------------	-------	-----------------------	------------------	-----------	------------------------	---------------------------------	-----------------------------------

**specify upholstery: non-vinyl, without soil-retardant treatment, without moisture barrier.

- flame retardants are only added when specified (fire code option).
 - steelcase offers PVC-free edge band (1mm and 3mm profiles) in several color options. if specifying a PVC edge band profile, it is common for it to fall below the 1% small component exemption. that percentage varies by product and option, and should be evaluated before claiming compliance.
- Chemical Content.
- electronics and the electronic components of furniture and furnishings are exempt from the criteria.
 - conformance assessments are made on typical/representative product configurations.
