Remarks

The chemicals titanium dioxide and carbon black are common ingredients of many types of materials, widely used in office furniture products and other industry products. For the specific applications used in office furniture products, these chemicals are fully encapsulated within the materials and, due to the resulting lack of an unsafe risk of exposure, do not constitute the health and safety concern behind their inclusion on the ANSI/BIFMA Annex B Chemical List.

ⁱ Materials and chemicals are disclosed for the specific style number and option configuration of the product as described in the Scope section, considering any noted exclusions and exemptions. Composition may change based on options selected by the specifier. Chemical constituents and members of chemical classes are disclosed if present at or above 0.01% (100 ppm) by total weight of product. Percentage weights are typical values. Proprietary ingredients include chemical constituents that are withheld by the supplier/raw material manufacturer and/or are shared with Steelcase only, as confidential business information. Information is obtained directly from suppliers, raw material manufacturers and other reliable sources. The contents of the documents are subject to change without notice.
